ABOUT ME

FullStack Developer with 5+ years of experience in designing, developing, and optimizing scalable applications. Proficient in problem-solving, writing clean and efficient code, and delivering high-impact solutions. Strong collaborator with a passion for modern technologies and continuous improvement.

EXPERIENCE

May 25 - March 26

LTIMindtree Ltd

Senior Software Engineer (NodeJS/ ReactJS)

- **P&G Olay**: Designed and maintained Azure Functions for high-volume e-commerce data migration (BigCommerce → Shopify), achieving 50% faster processing by optimizing batch operations and parallelism.
- Implemented BigCommerce v2/v3 APIs and Shopify GraphQL mutations to synchronize product/catalog data, ensuring 100% data consistency post-migration.
- Developed data-mapping logic to transform BigCommerce schemas into Shopify-compatible formats (JavaScript/TypeScript), enabling seamless storefront migration for P&G clients
- Enhanced system performance by reducing API response times by 40% through efficient pagination and parallel fetch optimizations in Node.js.
- **EY Risk.ai Internal Audit** : upgraded AI agents from GPT-4 to GPT-5.1 by revamping prompt infrastructure.
- Implemented React/Node.js UI changes and backend refinements based on user stories.
- Improved agent response quality by 20% using system-level prompt tuning and testing.

Dec 24 - March 25

Synechron Inc

Associate Technology (NodeJS/ ReactJS)

- **Asurion Japan Project** : Engaged in self directed learning and trainings.
- Collaborated with the team members to understand about the project workflows and requirements.
- Participated in internal training sessions and workshops to stay updated with the latest technologies and best practices.

Dec 21 - Sept 24

Iprogrammer Solutions

Senior Node.js Developer

- **UTEC by UltraTech Project** : Led backend development for UTEC, a largescale construction management system, leveraging Node.js to create scalable, high-performance solutions
- Architected robust infrastructure using AWS services like Lambda, EC2, S3, and OpenSearch to handle large data volumes efficiently
- Enhanced search functionality with OpenSearch, reducing query response times by 30%, and optimized database performance with MySQL and Redis, cutting latency by 25%.Utilized Node.js asynchronous processing for real-time updates and streamlined resource utilization.
- Conducted VAPT testing and implemented security protocols, ensuring a secure and reliable backend.
- Integrated multiple third-party APIs, enhancing the application's functionality and user experience, leading to a 20% increase in customer satisfaction.
- Mentored junior developers and enforced best practices through code reviews, fostering a culture of quality

Feb 21 - Nov 21

Reapmind Innovations

MERN Stack Developer

- **Vkonnnect Health Project** : Spearheaded the development of a high-performing admin panel using React.js, transitioning legacy code to functional components to improve performance and maintainability.
- Designed and implemented a seamless CI/CD pipeline for the frontend using AWS Amplify, ensuring automated and efficient deployments.
- Migrated the Node.js application from AWS EC2-based architecture to AWS Lambda, enhancing scalability and reducing infrastructure costs.
- Optimized complex database queries in MongoDB and MySQL, improving query performance and system response times.
- Authored clean, modular, and reusable code following industry best practices to ease maintenance and reduce technical debt.
- Managed the backend CI/CD pipeline using AWS Serverless Framework, streamlining deployment processes and integrating robustly with existing services.

SKILLS

- | | | | |
|-----------|--------------------|--------------|------------|
| • NodeJS | • AWS | • MySQL | • Postgres |
| • MongoDB | • OpenSearch (ELK) | • JavaScript | • Azure |
| • ReactJS | • Redis | • TypeScript | |

CERTIFICATIONS

- [Learn and Understand NodeJS \(2025 Edition\)](#)
- [Understanding TypeScript](#)
- [GitLab: Pipelines, CI/CD and DevOps for Beginners](#)
- [MySQL](#)
- [MySQL \(Advanced\)](#)
- [ReactJS](#)
- [React, React Redux and Redux Saga - Master React State/Hooks](#)
- [Mastering Typescript - 2025 Edition](#)
- [NodeJS](#)
- [JavaScript](#)

EDUCATION

2018 - 2021

Bharti Vidyapeeth
Deemed University

Bachelor's of Computer Application (BCA)

AWS SKILLS

- Compute: EC2, Lambda
- Serverless: AWS Lambda, API Gateway, S3
- Storage: S3
- Database: RDS (MySQL), ElastiCache (Redis)
- Networking: VPC, Route 53, Elastic Load Balancing (ELB), API Gateway
- Security & Identity: IAM, KMS, Security Groups
- DevOps & Management: CloudFormation, CloudWatch, AWS Config, Systems Manager, Cost Explorer
- Analytics: OpenSearch, CloudSearch, Athena
- Others: SNS, SQS, SES

KEY ACHIEVEMENTS

- **Developed Scalable Serverless Design**

Implemented nested CloudFormation stacks to streamline infrastructure deployment, improve resource management, and optimize scalability, reducing deployment time by 40%.

- **Increased Server Uptime**

Played a key role in enhancing the server uptime of Vkonnect Health's main product to 99.99%, directly impacting customer satisfaction.

- **Database Performance Optimization with OpenSearch and AWS Athena**

Improved database performance by integrating OpenSearch for fast search and AWS Athena for large-scale data analysis, reducing query times and boosting scalability.

- **Awarded "Best Team" recognition**

Worked in the Quality team on a 110-member UTEC project at iProgrammer Solutions, ensuring high-quality deliverables and supporting the project's success.
